LLOYD'S REGISTER OF SHIPPING

UNITED WITH THE BRITISH CORPORATION REGISTER

STATISTICAL SUMMARY

OF

MERCHANT SHIPS TOTALLY LOST, BROKEN UP, ETC.

DURING

1950

This Summary, which is based upon the quarterly returns of total losses, etc., also includes ships which had not been given up as total losses, or of the loss of which information had not been received, when the returns for the quarters in which they respectively occurred were compiled. Particulars of all such additions to the quarterly returns are given on pages 45 to 47.

A distinguishing feature of the Casualty Returns published by Lloyd's Register is that, except as stated in the footnotes to Table No. 1, they are compiled strictly according to the dates at which the casualties resulting in total loss actually *occurred*, and not according to the dates at which *reports* of casualties were *received*.
